## DANIELSON AND PUTNAM NEWS

### DANIELSON

One hundred five-ton motor trucks were being assembled here Wednesday by the Goodyear Tire and Rubber company for use in transporting tire fabric from their plant at Goodyear to the parent plant at Akron, O.  
The tie-up of railroad transportation facilities is responsible for the emergency arrangement made by this great corporation with its characteristic energy and resourceful manner of doing things.

A group of eight of the giant trucks each carrying five tons of fabric, left here just before noon on Tuesday, and five more of them, similarly loaded, got away late Wednesday evening. Fifteen more trucks were expected to arrive from New York at any minute, it was stated at 3 p. m. and the remainder of the 100 trucks will have arrived at Goodyear, loaded and started on their westward journey of more than 800 miles within the next 36 hours.

While the plant at Goodyear is becoming glutted with finished fabric, the plant at Akron is rapidly running out of the material and it is absolutely necessary that the loads now being sent overland be put through to Ohio before the beginning of next week to prevent the Akron plant, where 37,000 employees are engaged, from being tied up in its tire making departments.

Each truck that left here Wednesday was numbered and may be identified by persons sufficiently curious to watch for them as they make their way out of eastern Connecticut. The advance guard of the big fleet was made up of Mack trucks, each loaded with great rolls of duck covered with tarpaulin.

From Danielson they went south to Norwich, New London, New Haven and New York, from where they will proceed over the Lincoln highway to Philadelphia and Pittsburgh, the route taking them through the Alleghany mountains. It is expected that the first of the 100 trucks will reach Akron sometime during Sunday.

Trucks that make up the fleet are being assembled from New York, Providence, Fall River and Connecticut cities.

The Goodyear Tire and Rubber company has for several years been operating its own overland trucking system between Danielson, Goodyear and Akron, so the officials are certain that what they have set out to do—get the fabric to Ohio in spite of the railroad strikes—can be accomplished more speedily even than by freight.

What the cost for this class of transportation will be can only be estimated here, as officials do not talk about that feature. Figuring the usual charge of \$5 a day for the service of a 5-ton truck, however, it will be seen that one truck would cost \$300 a week or \$30,000 a week for 100 trucks.

It is figured that the trucks will be two weeks in making the round trip. Coming east they will bring tires, rubber soles and other products of the Goodyear Tire and Rubber company.

The court of burgesses has reorganized for the year as follows: Bulfinch committee, Frank E. Kennedy, Clinton W. Atwood; fire committee, William A. Burrows, Joseph Bodo; lighting committee, Joseph Bodo, Frank E. Kennedy; park committee, Herbert C. Keach, William A. Burrows; police committee, Herbert C. Keach, D. E. Jette; sewer committee, D. E. Jette, Atwood; A. Putnam; water ward is responsible chief of the fire department and Dr. W. H. Judson as health officer. Ernest R. Warren is reappointed librarian and Amelia B. Hutchins and Hortense E. Griffith assistant librarians.

Word was received here Wednesday of the death in London, E. J. Tuesday of Mrs. Frederick R. J. Tuesday, formerly of East Killingly. Mrs. Young was Miss Ella Burgess, daughter of Jeremiah and Maria Simmons Burgess, formerly of Chepachet and East Killingly. Mrs. Young leaves her husband and children. She was a sister of Mrs. Adelbert Chase, of East Brooklyn.

F. W. Nichols, of the Wheatfield farms at La Salle, N. Y., where he is herd manager, has been the guest of W. S. Brown, of the Shepherd hill farm at Wauregan, where one of the finest herds of Holsteins owned in this part of Connecticut is kept.

Mr. Brown has just completed a series of milk tests conducted during the winter period and has obtained some interesting statistics pertaining thereto. The tests were conducted on two-year-olds, taking everyone as they chose and not skipping any because of their being likely to prove poorer than the best. The eleven animals on test gave in seven days an average of 3.67 pounds of milk or an individual average of over 33 pounds of butter in seven days. Mr. Brown states that one of the animals on test was a yearling, and he says if any one knows of a better milk record made in eastern Connecticut, he would like to hear about it.

Mr. Brown stated Tuesday, following his interview with Mr. Nichols, that he had been offered \$100 for one of the two-year-olds and \$250 for four two-year-olds. Mr. Brown said on Tuesday that he told of these offers merely as an incentive to stir up interest in breeding better herds, which will double their production of milk without material increase in the upkeep cost of the herd.

Mr. Brown did not accept the offers made him for his young stock, believing the animals on which the offers were made are worth at least \$5,000. In the group is a popular Jewett DeKal Pledge. Mr. Brown says the two-year-old is a sister to the world's champion cow and that Jewess is now

Putnam may have the daylight saving matter to wrestle with again within the next few days, and the prospect isn't attractive to many here, after the experience of the last days of March. However, the plan of the New Haven road to run its trains one day late, saving time after April 25 seems bound to have its effect on the local arrangement of things. Whatever happens, Putnam henceforth will have the same time as the other towns near here and that is an important consideration.

Miss Ella Weaver, who is in Putnam undertaking a survey of the city, will conduct a special prayer service at the Baptist church this evening, when representatives of all departments of the church are expected to be in attendance.

The Fast Five were defeated in a match game at the local arena, losing by a large margin.
